SUMMARY

Frontend Developer with 2+ years of professional experience building and maintaining responsive, user-facing web applications using React.js, JavaScript (ES6+), TypeScript, HTML5, and CSS3. Experienced in reusable component development, React Hooks, Context API, REST API integration, responsive UI implementation, debugging, and frontend performance optimization. Skilled at translating Figma designs into maintainable interfaces and improving web accessibility and SEO through Lighthouse audits, semantic HTML, and ARIA attributes.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass/SCSS, Bootstrap, jQuery

React & State Management: React Hooks (useEffect), Context API, Redux Toolkit, component-based architecture, props and state

API Integration: REST APIs, Axios, Fetch, asynchronous data handling, API response debugging

UI, Performance & Accessibility: Responsive design, cross-browser compatibility, Figma-to-UI implementation, Chrome DevTools, Lighthouse audits, semantic HTML, ARIA, SEO

Tools & Additional Knowledge: Git, GitHub, Tortoise SVN, npm, Vite, VS Code, PHP (basic), SQL (basic), React Native (basic), Claude AI, ChatGPT

PROFESSIONAL EXPERIENCE

Frontend Developer — The Alchemist Ark Pvt. Ltd.

September 2024 – Present | Pune, India

Project: MoneyWorks4Me

Key Contributions :

- Developed and maintained responsive production web applications using React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS/SCSS, and Bootstrap.
- Built reusable React components and modular UI structures for scalable and maintainable frontend development.
- Used React Hooks, Context API, component state, and Redux Toolkit for managing application and UI state.
- Developed and enhanced Stock Screener, Mutual Fund Dashboard, Mutual Fund Screener, Investment Dashboard, Portfolio Manager, Watchlist, and Stock & Fund Listing modules.
- Integrated REST APIs using Axios/Fetch and handled asynchronous data flows to display dynamic stock, mutual fund, portfolio, and user-specific data.
- Translated Figma designs and UX requirements into responsive, pixel-accurate interfaces across desktop, tablet, and mobile devices.
- Implemented responsive layouts and adaptive UI behavior across different screen sizes and browsers.
- Improved frontend performance through code splitting, lazy loading, memoization, and UI-level performance optimization.
- Improved accessibility using semantic HTML, ARIA attributes, accessible controls, keyboard navigation, and Lighthouse audits.
- Implemented keyboard-accessible navigation across header menus and search interactions using Tab and Enter keyboard controls.
- Debugged and resolved production issues using Chrome DevTools, API response analysis, and frontend debugging techniques.
- Collaborated with backend developers and designers to understand requirements, API contracts, data flows, and implementation details.
- Used Git and Tortoise SVN for version control and collaborative development.

PROFESSIONAL EXPERIENCE

Project: React Redux Shopping Cart

React.js | JavaScript | Vite | Redux Toolkit | React Router | Form Validation | LocalStorage | Responsive UI

GitHub: https://github.com/Gathekar98/React-Redux-Project---Shopping-Cart

Live Project: https://ecomshopkart.netlify.app/

- Developed a responsive shopping cart application with product browsing and cart management.
- Implemented global state management, quantity controls, item removal, form validation, and local storage persistence.

Project: Picture Puzzle Game (PicPuzzle)

React.js | TypeScript | Vite | Capacitor | SVG | CSS3

GitHub: https://github.com/Gathekar98/picture-puzzle-game

Live Project: https://picture-puzzle-game-one.vercel.app/

- Built a 30-level interactive puzzle game using React and TypeScript with a custom state-machine architecture.
- Implemented touch-optimized drag-and-drop interactions using the Pointer Events API.
- Developed reusable UI components, dynamic SVG-based maps, persistent game progress, and responsive layouts.
- Optimized assets and build output through code shrinking and asset optimization.
- Packaged the application as a native Android APK using Capacitor.

Project: NexSkill Labs | EdTech Platform

React.js | JavaScript | Responsive Design | API Integration

GitHub: https://github.com/Gathekar98/NexSkill-Labs

Live Project: https://nex-skill-labs.vercel.app/

- Built a responsive multi-page EdTech platform with program information, registration, contact, and newsletter workflows.
- Developed reusable frontend components, responsive layouts, form validation, and user-facing application workflows.
- Worked with payment and API-integrated application flows.

Project: RingBox | Ringtone & Sound Discovery Platform

React.js | JavaScript | Freesound API | REST API | Vite

GitHub: https://github.com/Gathekar98/React_RingBox-ringtone-download-platform-

Live Project: https://react-ring-box-ringtone-download-pl.vercel.app/

- Built a modern sound discovery platform with search, browsing, audio playback, and sound detail functionality.
- Integrated external APIs to dynamically fetch and display sound content.
- Developed reusable React components and responsive user interfaces.

EDUCATION

Bachelor of Engineering (B.E.) - Electronics & Telecommunication **2015-2019**

Prof. Ram Meghe College of Engineering & Management, Amravati

Passed out with 67.17% (Aggregate)
